

The Suffolk Multi Fuel Stove Range

Traditionally styled cast iron stoves

The Suffolk range, first introduced in 2003, have since built an enviable reputation for reliability and great value. Traditional styling combined with high combustion efficiency ensure that Suffolk wood-burning and multi-fuel stoves can offer a viable alternative heat source in an age of rapidly increasing energy costs.

Now significantly upgraded and improved for the 2008/9 season, all models are built to comply with European Standard EN 13240 and include approval for installation on 12mm deep hearths.

With heat outputs ranging from 5kw to 16kw, single and two door options, multi-fuel grates as standard and the flexibility to install with top or back flue outlet, the Suffolk range caters for virtually every installation requirement.

These robustly built cast iron stoves represent excellent value, will give years of trouble free operation and are simple and safe to operate. All stoves are provided with the necessary operating tools, user instructions and a heat proof mitten.

Rear View:
Featuring a unique control
of both secondary, primary
and tertiary air supply

ST0709 Capel

Output: 5kw
Fuel: M/F
Weight: 67KG
Dimensions (wxdxh): 410 x 370 x 530mm
