

NEW FOR 2014

THE NEW NEWBOURNE 35FS MULTI FUEL STOVE Nominal 3.9kW output

The Newbourne 35FS is the smallest stove in the Newbourne range and is ideal for installation into a small fireplace opening with a minimum size of 20" x 28" height. Although small in size, it is big in features with 80% efficiency, stylish good looks and excellent heat output. A full size curved door and large viewing window gives an impressive view of the fire burning beautifully yet efficiently in the firechamber. With a portrait design the stove is ideal for installation in canal boats, townhouses or country cottages, whether installed into a fireplace or a freestanding situation to warm your home and heart.
